Slide title

Some super quickly created demo slides

- Do not need anything else than markdown
  - Slides title starts with # (also starts a new slide)
  - Bullet points, newlines, empty lines: all standard markdown
- However, can also use other stuff, e.g.:
  - Some HTML (e.g. <center>)
  - When using pandoc beamer, can use latex commands (e.g. \center, \large, etc)...

Some code

```python
def foo():
    a = 10
    return 1

cars = ['ford', 'mercedes', 'bmw']
cars.reverse()

cars.count(cars)
```

Statement

"Notable quote"
